Implementing Finance Solutions for Biodiversity and Sustainable Development

Closing Mexico’s Finance Gap for Biodiversity with Innovative Solutions

Mainstreaming Biodiversity in Strategic Sectors
- Financing Ecosystem Based Adaptation through Vertical Funds
- Expanding Local Finance Schemes for Conservation
- Aligning Result Based Budgeting to the SDGs
- Propelling Nature Entrepreneurship and Impact Investment

Unlocking the National Climate Change Fund of Biodiversity Finance

Scaling the Environmental Programme of the National System for Public Investment

Increased Financing

Reduced Needs

Finance Needs of the NBSAP (2017-2020)
USD $1.8 billion

Finance needs beyond the NBSAP
Cost of Environmental Degradation and Resource Depletion related to biodiversity in 2015
USD $11.6 billion

Bonn Challenge Restoration (2014-2020)
USD $6.3 billion

Existing Resources
Public Expenditure in Biodiversity
USD $1,169.8 million
*2015, baseline

Generate revenue, realign expenditures

Baseline

Expected Results

Realignment of expenditures, avoid future cost, deliver better

This initiative is supported by the European Union

This project is co-funded by the European Union
